

Effortless AI-powered Learning

RealPlay™ Overview

Training new staff, upskilling teams in new products or supporting seasonal ramps can cost organisations hundreds of thousands per year in resource costs, and still deliver a subpar customer experience. Our proprietary award-winning RealPlay™ Learning Solution leverages the latest Artificial Intelligence (AI), voice recognition, machine learning technology, responsive game development, and data visualisation to simulate the same real-world customer scenarios associates experience before they take live calls from real customers.

RealPlay's three components work cooperatively and seamlessly to prepare learners for success

RealPlay BOT

AI-powered engine that provides asynchronous practice, consistent feedback and personalised coaching

RealPlay Sandbox

Responsive frontend and database that enables HIPAA and PCI compliant systems practice

RealPlay Dashboard

Operations-based, insights platform that provides KPI performance, including speed-to-proficiency

Make learning fast, engaging and effortless with our award-winning RealPlay™ solution

Traditional training methods can be unengaging and have ongoing expenses that add up to large amounts of money over time. Our RealPlay™ learning solution is easy to implement, requires minimal upkeep and upskills employees quickly and effectively.

RealPlay™ AI-powered Learning drives real-world results

RealPlay™ How It Works

Shows completed and missed actions → 5/7 Above Standards

Practice again → [Retry Scenario](#)

Missed and completed actions feedback →

- WEAKNESSES**
 - You failed to provide the customer with next steps. This can result in a decrease in customer satisfaction in the event the customer's issue reappears and they require further support. (Missed Call)
 - You failed to assure the customer that the issue would be resolved, which can result in lower satisfaction and lack of faith in your service during the call. Assurance statements are at the core of establishing rapport and building trust with our customers. (Missed Call)
- STRENGTHS**
 - Your greeting included mention of [redacted] which provides the customer with assurance that they have not only contacted the right place, but also connects the customer to the brand from the start of the interaction. Furthermore, it establishes ownership of the call from the start. (Brand Call)

Actionable feedback recommendation →

Suggested Feedback

This is feedback on your recent conversation. Consider this next time you encounter this situation.

Customer: Ok, it looks like we are all set, thank you.

Associate: The only thing you have to do is go online and add to your balance so you can send messages again. If you have any questions, don't hesitate to reach out again and we will be happy to assist you.

Customer: Thanks. Have a good day.
